The screenshot displays a Zoom webinar interface. The main content area shows a presentation slide with the following text:

With the UN declaring 2021-2030 the "Decade on Ecosystem Restoration", scope for studies and research on Restoration Ecology will gain importance, more than before.

SO YOU HAVE THE OPPORTUNITY to work and prosper in this field

Below the text is a photograph of a dense green forest. At the bottom of the slide, the words "Thank You" are visible in a yellow font.

To the right of the slide, a vertical sidebar shows the names of participants: "You", "Chaitanya A", "prasad", and "Nithya".

Below the slide, a list of factors for forest degradation is shown:

- A. Degradation of forest land of sacred groves**
 - a. Damage to established seedlings due to trampling
 - b. Illegal collection and removal of biomass
 - c. Grazing
 - d. Deposition of floating waste materials
- B. Abuse of forest land of sacred groves**
 - a. Dumping solid wastes
 - b. Illegal activities by anti-social elements
 - c. Increased tourism activities instead of pilgrimage
- Erosion of traditional social and cultural set up**
- Changing socio-economy, landuse patterns and policies**

The background of the list includes small images of forest areas with various types of waste and human activity.

The Zoom interface includes a search bar at the bottom, a taskbar with system icons, and a Windows taskbar at the very bottom showing the time as 1:52 PM.

Webinar on Forest Degradation in the Western Ghats, organized by the Dept. of Botany

Forest degradation in the Western Ghats and restoration strategies

2. Chronic anthropogenic disturbance: Example 3.
Sacred groves: Community conserved Biodiversity areas:

Sanctified patches of forests protected by the strength of religious beliefs as abode of Gods and Goddesses

Forest degradation in the Western Ghats and restoration strategies

2. Chronic anthropogenic disturbance: Example 2.
Shoia forests- High altitude forests with difficult terrain are also affected

Anthropogenic disturbances
1. Cattle grazing
2. Fire wood collection
3. Lemongrass cultivation
4. Small timber collection
5. Construction of roads adjacent to forests
6. Tree Fern (Cyathea) collection

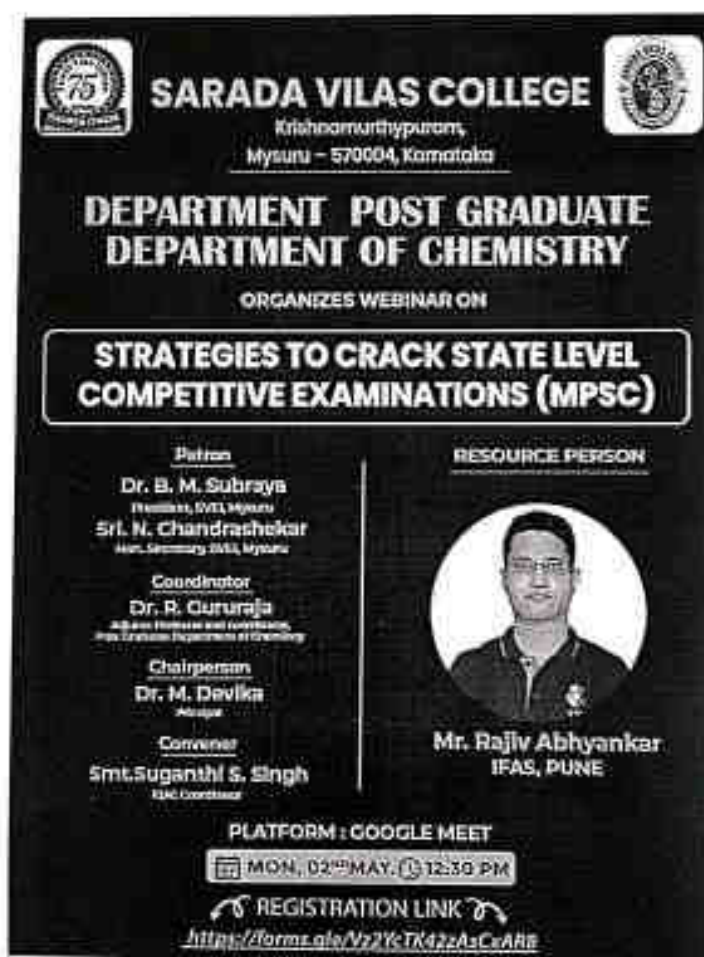

Restoration Strategies

- Enrichment planting in disturbed shola
- Raising energy plantations
- Development of lemongrass-firewood based agroforestry systems
- Reduction of grazing pressure
- Suspension of shifting cultivation
