REPORT

The department of Zoology conducted an add on certificate course titled "Fundamentals of Sericulture" with duration of 30 hours with strength of 42 students. Sericulture, or silk farming, is the cultivation of silkworms to produce silk. The 'Fundamentals of sericulture' is the study of rearing of silkworm, Components of Sericulture and entrepreneurship. This course provides vast job opportunities in both government and private sectors. The professionals can work in research centers, textile industries, and development centers. They can also start their farm-related to this field and can supply raw materials to the textile firms. The classes were held on every Saturday. Ms. Spoorthy S was the coordinator of the course. The students were issued certificates after successful completion.

Points Discussed & Meeting Resolutions :

1. The course plan was designed around the topics of microbial culture media preparation, methods for isolation of pure culture, and preservation of pure cultures.
2. The course was titled "**Microbial Culture Techniques**" and was scheduled to be held between 15/10/2022 to 31/01/2023.
3. The total duration of 30 hours was allotted to the course with 14 hours of theory and 16 hours of practical sessions.
4. Sri. Tribhuvan K.R. and Sri Abhilash H.S., were nominated the faculty in-charge for the certificate course.
5. The prepared syllabus was scrutinized for time feasibility and was approved.
6. The outcome of the course and the details of award of certificates to students were also discussed.
7. The pattern of attendance and assessment procedure was also finalized.

Student Circular

The Department of Microbiology is organizing an add-on certificate course on the topic of "**Microbial Culture Techniques**" for final year B.Sc., BMBt students. Interested students can enroll themselves within 05/10/2022.

For enrollment and further details contact the faculty in-charge of the course Sri. Tribhuvan K. R. or Sri. Abhilash H.S., Dept. of Biotechnology.

SYLLABUS

Unit I - Sterilization techniques

- 7 H

Terminologies - sterilization, disinfectant, antiseptic, sanitizer, germicide, microbicidal agents, microbiostatic agent and antimicrobial agent.

Physical methods of sterilization: Dry heat sterilization - Flaming, incineration and hot air (Hot air oven); Moist heat sterilization - Boiling & steam (Autoclave); Pasteurization, Fractional sterilization-Tyndallization. Filtration - Diatomaceous earth filter, seitz filter, membrane filter and HEPA. Radiation - Ionizing radiation (γ & X rays) and non-ionizing radiation (UV rays)

Chemical methods of sterilization: Alcohol, aldehydes, phenols, peroxides, halogens, metals, quaternary ammonium compounds, antibiotics and sterilizing gases as antimicrobial agents.

Unit II - Pure Culture Techniques

- 7 H

Culture Media: Components of media, natural and synthetic media, chemically defined media, complex media, selective, differential, indicator, enriched and enrichment media

Pure culture methods: Serial dilution and plating methods - pour, spread, streak, replica.

Colony characteristics & growth measurement: Bacterial colony characters and fungal colony characters, Growth curve, enumeration methods (turbidity, cell counting, colony counting)

Preservation of microorganisms: Methods of preservation of microorganisms; slant culture, stab culture, soil culture, mineral oil overlaying, glycerol preservation.

- 16 H

Practical

1. Preparation and sterilization of labwares for microbiology.
2. Components and preparation of media for culture of bacteria & fungi
3. Isolation of bacteria & fungi from soil, water and air - serial dilution, pour plate, spread plate, and air exposure methods.
4. Identification and recording of colony characteristics and enumeration (CFU).
5. Pure culture techniques - streak plate, replica plate & point inoculation.
6. Sub culture techniques - slant culture & stab inoculation.
7. Preservation of pure cultures - refrigeration & mineral oil overlaying.

Add on Certificate Course Outcome

"Microbial Culture Techniques"

- ❖ Culture techniques are the fundamental skill necessary in all divisions of microbiology like isolation and characterisation; industrial applications such as fermentation and pharmaceuticals; disease & diagnostics; genetic studies and engineering; etc.
- ❖ This course offers understanding of the principal and applications of sterilization techniques through practical exercise.
- ❖ The course also focuses on the types of media used in microbial culture and the role of key components.
- ❖ Students will be able to identify and record the colony characteristics of bacterial and fungal origins.
- ❖ Students will also obtain competence in handling of laboratory tools such as hot air oven, autoclave, burners, incubator, pipettes, and other labwares.
- ❖ Students will also learn the key differences between different types of culture techniques and involve these techniques in routine microbial isolation experiments.
- ❖ The course also focuses on preservation of pure culture.
- ❖ Overall the course will provide the proper understanding and practical experience of sterilization, media preparation, isolation, pure culture, sub-culture and preservation techniques for a strong foundation in basic skills for any microbiologist in both academic and industrial setup.

Course Duration : 30 Hours.

Attendance : 75% min.

Maximum Marks : 100.

Minimum Marks : 40.

Marks Allocation:

C1 - Written Test : 40 marks

C2 - Assignment : 10 marks

C3 - Practical Test : 50 marks

Grade allotment:

Distinction : 80 marks and higher.

First Class : 60-79 marks.

Pass class : 40-59 marks.

Less than 40 marks should repeat the tests.

REPORT ON

Add on Certificate Course on "*Microbial Culture Techniques*" 2022-23

Course Length : 30 Hours
Course Duration : 15/10/2022 - 31/01/2023
Class timing : Saturday 2 to 4 pm.
Course in-charge : 1. Sri Tribhuvan K. R.
2. Sri Abhilash H. S.

No. of Participants : 39

The Department of Microbiology conducted an add-on certificate course of 30 hours titled "*Microbial Culture Techniques*" duration for the final year B.Sc. BMBT students of Sarada Vilas College as a tool for empowering them with the basic skills necessary to flourish in the field of microbiology.

Sri. Tribhuvan K.R. and Sri. Abhilash H.S., Assistant professors, Dept. of Biotechnology, Sarada Vilas College were in-charge of the course curriculum. A total of 39 students took part in the course. The students underwent theoretical and practical training in various techniques and methods used in basic microbial studies. The students were assessed upon completion of the course and were issued certificate of participation in the add-on course.

Meeting Resolutions for meeting held on 23/09/2022

- The department held a meeting on 23/09/2022 along with Principal & IQAC coordinator and it is decided to start the certificate course on "**Microbial Biochemistry**".
- The course is focusing on enhancement of knowledge in "**MICROBIAL BIOCHEMISTRY**".
- The course is majorly offered for sixth semester students as supporting to their curriculum.
- The syllabus of the course is discussed and presented in the meeting and approved in BoS.
- The duration of the course is 30hrs.
- Mrs. SUMAN NARAYAN is the in charge of this certificate course
- It is scheduled to conduct the class from 20/10/2022 to 21/01/2023.
- The detail time table is made and attached with this resolution.
- The attendance of students has to be maintained.

CURRICULUM FOR MICROBIAL BIOCHEMISTRY

Unit I:

- Spontaneous generation (abiogenesis), Biogenesis, Germ Theory of Disease, Koch's Postulates, Scope of Microbiology. Microorganisms in biological world Whittaker's Fivekingdom and three-kingdom concept of living organisms (General characteristics of those groups); General features of Eubacteria and Archaeobacteria (major difference within Eubacteria).
- Staining techniques and bacterial morphology and subcellular structures. Definition of auxochrome; Chromophores; Acidic and Basic dyes; Classification of stains; Simple and differential staining: theories of staining, Gram staining; acid fast staining; endospore staining; mechanism of gram staining.

Unit II:

- Microbial Nutrition: Nutritional types (definition and example) - Photoautotrophs, Photoorganotrophs, Chemolithotrophs (ammonia, nitrite, sulfur, hydrogen, iron oxidizingbacteria); Chemo organotrophs, Effect of oxygen on growth - classification on the basis of oxygen requirement and tolerance.
- Bacterial Growth and its regulation: Growth phases - Generation time. Kinetics of growth, Batch culture. Continuous culture. Synchronous culture (definition and brief description). Physical factors influencing growth temperature. pH, osmotic pressure, salt concentration. Sterilization, disinfection, antiseptic, sanitizer, germicide, antimicrobial agent (definition, application & examples); physical method of disinfection and sterilization - dry heat, moist heat, filtration, radiation (mode of action, applications); Chemical control - dye solutions, alcohol, acid, alkali, halogen, heavy metal, phenol, phenol derivatives, formaldehyde, ethylene oxide, detergents (mode of action, applications).

Unit III:

- Chemotherapeutic agents - sulphonamides, antibiotics, (definition types); mechanism of action and antimicrobial spectrum of penicillin, streptomycin, tetracycline, chloramphenicol, Nalidixic acid and metronidazole; drug resistance - phenomena and mechanism.

COURSE OUTCOME FOR MICROBIAL BIOCHEMISTRY

On successful completion of the course, students will be able to:

- Familiarize basic concepts in microscopy and sterilization procedures:
- Explain general characters of different groups of microbes and culturing media:
- Explain classification of microbes and examine different methods for bacterial identification, growth, and regulation.
- Understand core concepts and fundamentals of chemotherapeutic agents and their mechanism.

Aspects of Communication and Usage of English Grammar
2022-23

Outcome:

The following are the advantages for students after completing this course:

In many facets of life, effective communication is fundamental to success. Language plays an important role as the main medium for learning in both formal and informal educational settings.

This certificate programme aims to gradually enhance students' LSRW (listening, speaking, reading, and writing) abilities using a communicative approach to teaching and gaining a foundational grasp of language. Additionally, it might help them with grammar and vocabulary. As a result, students may be able to apply to graduate programmes and pursue careers as writers, editors, researchers, etc. Students improve their writing abilities and communication skills as a result of this. Furthermore, this certification validates their skill set and lends legitimacy to prospective employers.

Report on the Certificate Course

In order to support final-year BSc students with their professional development and exam preparation, we arranged a certificate course on basic English grammar and conversational abilities for the academic year 2022–2023. In accordance with their fifth semester, the classes ran from October to December for three months. Since the goal is to improve a student's capacity to utilise the global language for their own well-being, the schedule is designed such that the teacher must pay close attention to each student's performance in class. Thirty students in total registered for the course; we divided them into two batches, with each batch attending two courses per week.
